Statistics in Schools

Statistics in Schools (SIS) is an education program fueled by the U.S. Census Bureau and created by teachers, for teachers.
Why the 2020 Census Matters to Schools

- Special education
- Free and reduced-price lunch
- Class sizes
- Classroom technology
- Teacher training
- After-school programs
- Head Start
- Playground and public parks
- Public transportation
Reaching Schools
New Materials for 2020

They grow up so fast.
Now’s your chance to shape their future.

A Zebra home (located in the 2020 Census at the site 2020.census.gov) was set up in the living area with the TurboTax home model. The crowns of your capped teeth, linked via the Convex-Diagonal model, support the tooth's upright position.

Back home, students receive the census form and other materials electronically through the Feds. The method is virtually identical. The census form is designed for an immediate, efficient, cost-effective form.

Students are learning how to use the 2020 Census to conduct a survey of many areas from home (the United States) to the world. According to the Census Bureau, the average time to complete the Census on a computer is less than 30 minutes. According to a recent study, the median time to complete the Census was 20 minutes. This is an important achievement.

You have the power to shape your future, and the future of all children, by counting everyone in your home in the 2020 Census. Learn more about how you can shape your future at 2020CENSUS.gov.

Getting an Accurate Count

Diversity in the United States

WHERE WE LIVE AND WHO WE ARE

How Many People Are in My Home?

Adults at Home:

Today we learned that the census counts people. Counting people helps the government make important decisions—like how many parks we need or how many schools we should have. It’s important to be counted in the census!

Let your child draw a picture of everyone who lives in your home. Then guide them in counting how many people live in your home.

I have [number] people in my home.
# Key Dates

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>March 12 - 20</td>
<td>Household will begin receiving official Census Bureau mail with detailed information on how to respond.</td>
</tr>
<tr>
<td>April 1</td>
<td>Census Day is observed nationwide. Once the invitation arrives, you should respond. When you respond, you'll tell the Census Bureau where you live as of April 1, 2020.</td>
</tr>
<tr>
<td>April</td>
<td>Census takers will begin visiting college students who live on campus, people living in senior centers, and others who live among large groups of people.</td>
</tr>
<tr>
<td>May - July</td>
<td>Census takers will begin visiting homes that haven't responded to the 2020 Census.</td>
</tr>
<tr>
<td>December</td>
<td>The Census Bureau will deliver apportionment counts to the President and Congress as required by law.</td>
</tr>
</tbody>
